WE BELIEVE IN ANOTHER WAY TO DRIVE. TO FEEL THE ROAD WITHOUT TAKING A SINGLE CURVE FOR GRANTED. TO VALUE EVERY SINGLE DETAIL. FROM THE WHEEL RIMS TO THE REAR COAST TO COAST LIGHTS. WE BELIEVE IN THOSE WHO ASK IF A BUCKET SEAT IS REALLY NECESSARY, OR IF 310 HORSES IS TOO MUCH. BECAUSE THE NEW CUPRA FORMENTOR IS NOT FOR THOSE WHO NEVER QUESTION. BUT FOR THOSE WHO DO, AND STILL DECIDE TO GO AHEAD.

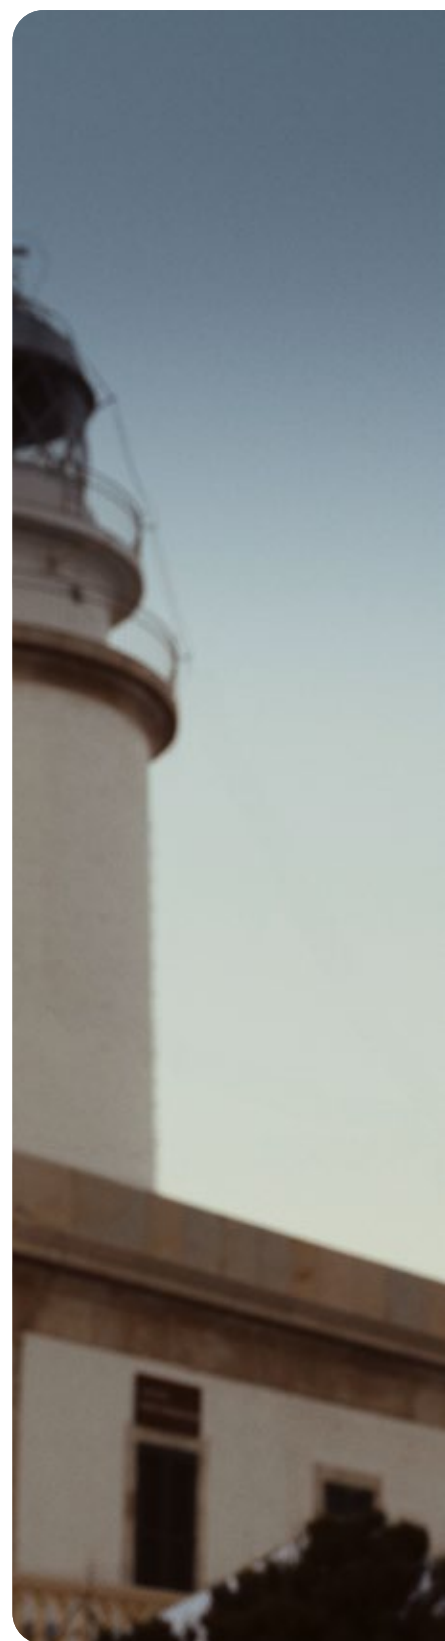

ANOTHER WAY TO OBSERVE

BEAUTY. YOU CAN ARGUE ABOUT IT, OR YOU CAN ENJOY IT. BECOME ANGRY WHEN OTHERS CANNOT SEE THE SAME BEAUTY THAT YOU DO, OR UNDERSTAND THAT IT IS PRECISELY THE SUBJECTIVENESS OF BEAUTY THAT MAKES IT ETERNAL. ONE PERSON, ONE BEAUTY. UNTIL THE END OF TIME. THIS OTHER BEAUTY, WITHOUT LIMITS OR RESTRICTIONS, HAS LITTLE TO DO WITH THE OBJECT BEING OBSERVED, AND EVERYTHING TO DO WITH THE EYES THAT LOOK UPON IT.

ISN'T THAT BEAUTIFUL?

A hand with light-colored skin and short, clean nails rests on a dark, smooth surface. Below the hand, the image transitions into a close-up of a car's front grille. The grille features a complex, geometric pattern of raised lines. A prominent copper-colored logo, resembling a stylized 'C' or a similar emblem, is visible on the right side of the grille. The lighting is dramatic, highlighting the textures and metallic finishes.

ANOTHER WAY TO MOVE

YOU GO RUSHING THROUGH LIFE. YOU WANT EVERYTHING IMMEDIATELY, AND HATE TO WAIT. BUT MAKE NO MISTAKE. HASTE HAS LITTLE TO DO WITH SPEED. HASTE IS YOUR ENEMY. IT MAKES YOU ARRIVE WITHOUT ENJOYING THE JOURNEY. SPEED, CONTRARY TO WHAT MANY PEOPLE THINK, IS NOT ABOUT WHO ARRIVES FIRST. IN FACT, IT'S NOT EVEN ABOUT ARRIVING. IT'S ABOUT MOVING SO FAST THAT YOU CANNOT PERCEIVE A DIFFERENCE BETWEEN THE ROAD AND YOURSELF. CHOOSING THE LONG WAY. KNOWING THERE IS ANOTHER WAY TO DO THINGS. TO STOP ASKING: "DO I REALLY NEED THIS POWER?", AND START ANSWERING:

"I'LL FIND OUT WHEN I ACCELERATE".

↑ *FEEL ALIVE*

Hit 100km/h in just 4.9 seconds with a powerful 310hp engine, enabling up to 250km/h. All the optimum specs you can expect from the CUPRA Formentor.

↓ *PRIME

POWER*

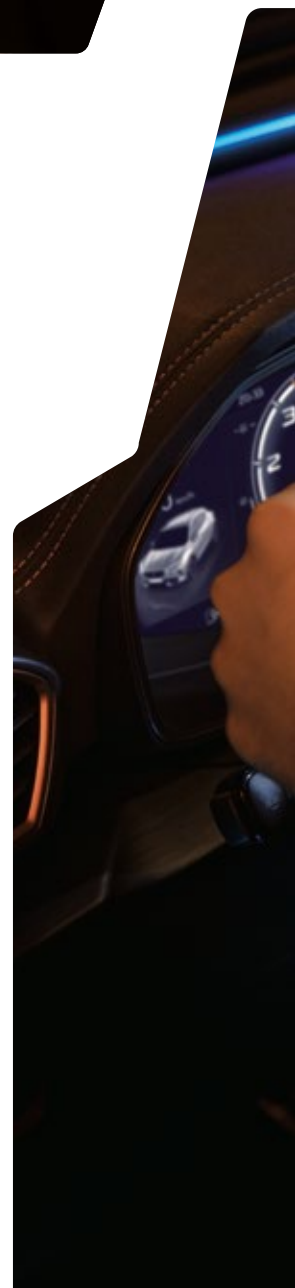

Harness full control

BUTTONS*

The racing inspired satellite buttons around the CUPRA steering wheel allow you to shift between drive profiles with ease.

BOTH WORLDS*

Moving towards electrification is not about compromising, it's about having the freedom to drive without restrictions. The CUPRA Formentor e-HYBRID gives you full electric range of 60 km* to explore the inner city and switches seamlessly to petrol when you need to go further.

↑ *A NEW ERA OF
PERFORMANCE*

With a hybrid engine capable of delivering 205hp, The Formentor e-HYBRID boasts all the style and attention to detail you'd expect from a CUPRA, with 18" alloys and sport seats fitted as standard. While the Formentor VZ e-HYBRID adds robustness to its 245hp engine, 19" rims and bucket seats, for an even sportier drive.

* The accurate range for your vehicle will vary according to a number of different factors which include the route, weather conditions, vehicle load (occupants + luggage), battery age and condition, optional equipment (alloys, tyres, etc.), the use of peripheral energy consumption systems such as heating, air conditioning and heated seats, as well as your driving style.

The indicated range has been calculated in compliance with WLTP standards, which set out test conditions applicable to all car manufacturers to ensure the comparability of these tests for all vehicles.

ENVIRONMENTAL INFORMATION

AIR QUALITY

Diesel engines incorporate an optimised exhaust gas treatment, the Selective Catalytic Reduction system (SCR), with AdBlue® twin dosing to further minimize nitrogen oxide emissions.

LIGHTS

Headlamps and rear lamps are 100% LED, reducing significantly power consumption and increasing life and effectiveness of the lights.

RENEWABLE AND RECYCLED MATERIALS

Use of renewable materials (cotton, natural rubber and cellulose) and recycled materials (plastics) in various parts of the vehicle.

TYRES

Low rolling resistance tyres provide a reduction of the rolling resistance coefficient.

BRAKES

Incorporation of RBO technology (which reduces the residual brake torque between the brake pad and disc), permits an emissions reduction of up to 1 g CO₂/100km.

AERODYNAMICS

Improved vehicle aerodynamics, thanks to optimised design of the bodywork, wheels and cooling system.

BODYWORK

Use of ultra-high strength steel, which together with hot stamping technology, permits a reduction in thicknesses and weight without loss of performance.

ACOUSTICS

All versions incorporate a double-seal system on the doors, which reduces noise levels and enhances comfort.

SEATS

The use of new PUR foam formulations reduces the emission of volatile organic compounds (VOCs) in the cabin interior by up to 50%.

ENGINES

e-HYBRID: The all-electric motor in the e-HYBRID engine enables zero emission driving in electric mode.

Move to ZERO, CUPRA's environmental mission
[Climate Change](#). [Resources](#). [Air Quality](#). [Environmental compliance](#).

MANUFACTURING PROCESS

In the period from 2010 to 2021 we have reduced the CO₂ emissions per manufactured car by 61%, while also cutting the energy demand per car by 17%. Additionally, we've achieved a 29% saving in water consumption and a 75% reduction in waste generated per car.

The re-usage of the sludge generated in our Paint Shop as base material for the construction of paved roads allows us to reduce the amount of wasted generated in our productive process and reduce the use of prime materials for the construction.

E-RANGE MONITOR

Informs the driver of the increase in range of electric-only engine when switching off.

ZERO EMISSIONS

An indicator that shows the distance driver with zero emissions using electric-only mode.

INTELLIGENT HYBRID

A function that helps the driver to conserve and optimise electrical power based on the planned route.

TECHNICAL SPECIFICATIONS

Discover all the technical specifications by engine type, from emissions and consumption data; to performance statistics and transmission types.

Here you'll find all the technical aspects covered so you can make an informed selection when it comes to your CUPRA Formentor.

* The accurate range for your vehicle will vary according to a number of different factors which include the route, weather conditions, vehicle load (occupants + luggage), battery age and condition, optional equipment (alloys, tyres, etc.), the use of peripheral energy consumption systems such as heating, air conditioning and heated seats, as well as your driving style.

The indicated range has been calculated in compliance with WLTP standards, which set out test conditions applicable to all car manufacturers to ensure the comparability of these tests for all vehicles.
